Products:

- JDE E1 Financials
- JDE E1 Supply Chain
- JDE E1 Capital Asset Management
- JDE E1 HCM

Partner

The City of Prince George selected *iSP³* as a partner to assist them in upgrading to E9.2 due to their depth and breadth of experience with JD Edwards and the public sector.

iSP³

With one of the largest JD Edwards practices in Canada, *iSP³* has the greatest number of senior level JD Edwards' consultants with industry and software experience and expertise. Also, *iSP³* is an Oracle Platinum Partner, Titan Aware winner and a customer of Oracle operating their business on JD Edwards. *iSP³* has a lab with the most up to date environment where testing is performed to ensure the base software is operating as designed.

About *iSP³*

iSP³ is an Oracle Platinum business partner certified in Finance, Project Costing, Supply Chain, Technical CNC and Accelerated Solutions. *iSP³* offers services in upgrades, net new implementations, product development, project management and training. Consultants across Canada, the US and Latin America. Client base in North America, Latin America and Eastern Europe.

The Organization

The City of Prince George sits on the traditional lands of the Lheidli T'enneh First Nation, whose name means "people where the rivers come together" in the Carrier language. The City's logo reflects this "coming together" in the way it depicts the confluence of railways, highways, and rivers that give rise of Prince George's reputation as Northern BC's service hub.

Today, Prince George is a city of 74,000 people and is the largest city in northern British Columbia. It is a community with assets that include a university and college, affordable housing, well-paying jobs, and comprehensive transportation infrastructure. Prince George's highways and railways, in particular, are complemented by an international airport and these vital transportation links connect local residents and businesses, resources (primarily forest products, energy, minerals, and metals), and agricultural products to markets around the world.

Project Details

The City of Prince George first implemented JD Edwards in 2002 on release B733 (Xe) and continued an upgrade path to E9.1 with assistance from *iSP³* along the way over the years. The City of Prince George's policy is to stay current with JDE Applications and Tools Releases. In 2016 it was decided that an upgrade to JD Edwards E9.2 was in order to remain current with the application release as well as take advantage of applicable new features and functionality moving forward. The upgrade began in October 2017 and completed in May 2018 on time and on budget for all in-scope activities.

The project was completed successfully on time and on budget.
