9.2 REASONS WHY YOU SHOULD BE ON THE LATEST RELEASE OF ENTERPRISEONE

iSP3 ORACLE | Partner

Technology is constantly moving forward. An important question for all companies to ask themselves is where your business is going and how your ERP and technology align to support this path. **Being current on the latest release of EnterpriseOne means you have a platform to enable current and future innovation.** There are hundreds of Application Enhancements in 9.2 with more added each month. Taken on their own they add value but as you step back and see how they come together you get a better perspective of the cumulative and continuous value of 9.2.

With Premier Support through at least 2032, here is why you should be running the latest release of EnterpriseOne.

1 - RAPID REACTIONS

The latest enhancements delivered with 9.2 react quickly to new business trends, regulatory requirements, and technology advancements.

2 - RISK REDUCTION

You stay current with upgrades and patches which greatly reduces the risks involved with neglecting key infrastructure and time-locking your systems. Risks are evaluated in the same manner as other business infrastructure items.

3 - ENABLE INNOVATION

This is a platform to enable current and future innovation by leveraging new technology from IoT, mobile, AI and others to be successful and competitive.

4 - IMPROVE BUSINESS OPS

Modernize business and improve efficiencies through enhancements such as Joint Venture Management, Basket Price, Work Center Load Review Calendar, Role-Based Pages, pre-configured notifications, simplified user experiences and more.

5 - FASTER FINANCIAL CLOSE

Highlights include improved auditability, interactive reconciliations that are more than 50X faster, real-time summarization of Account Ledger totals, informative error messaging, end-user driven financial reporting, and improved financial controls.

6 - TRANSFORM MANUFACTURING

Simplify, automate, and control Manufacturing processes with Production Scheduling, drag and drop functionality, visualizations, improved performance, and reduced customizations. You also gain the ability to easily add costs for multiple items and eliminate discrepancies between the Item Ledger and General Ledger.

7 - MAXIMIZE INVENTORY

Improve organizational spend with optimal inventory levels by highlighting condition-based alerts, increasing accuracy and ensuring appropriate discounts are applied. You'll simplify posting of General Ledger Batch, eliminate manual entries, and ensure data quality.

8 - BOOST ORDER MANAGEMENT

Focused dashboard lets you improve customer satisfaction while maximizing revenue. Optimize pricing flexibility as market conditions change, get better order visibility, improved awareness, timelier fulfillment of orders, simplified localized invoicing, and validation to minimize business risk.

9 - REFINE PROJECT PERFORMANCE

Through notifications, UX, and faster Job and Project Status analysis you'll be able to easily gauge the financial health of a project. Access all aspects throughout the entire lifecycle, evaluate financials and associated billings, find contract master information with additional search fields, drive awareness, and reduce the time to take action.

.1 - ORCHESTRATOR

The power of Orchestrator allows customers to harness IoT to let devices and machines become users so that your system stays up to date without human intervention. Many customers find that getting started with iSP3's Orchestrator Library give them immediate benefits and ease the initial learning process.

.2 - CONTINUOUS INNOVATION

Oracles Continuous Innovation model delivers the latest functionality as updates to the existing release. You can adopt enhancements based on how you want to best serve the business rather than on an end-of-support date. For customers on 9.2 not dealing with major upgrades have been a great benefit to them. At iSP3 we run 9.2.4.5 on OCI and we can attest to the benefits that continuous innovation has brought.

The future is in your hands. EnterpriseOne 9.2 gives you the chance to simplify and transform your business processes, eliminate customizations, provide new user experiences, and take advantage of new business opportunities.
