

GET YOUR HEAD IN THE CLOUD

MAKE THE MOVE TO OCI

Every business needs to develop a cloud strategy and an enterprise cloud architecture.

WHAT IS ORACLE CLOUD INFRASTRUCTURE (OCI)?

OCI is a **true Enterprise Cloud platform** with superior performance, scalability, and heightened layer security. JD Edwards can be deployed on OCI as a means to gain the many advantages of Cloud architecture while continuing to use JD Edwards applications.

WHY OCI?

Customers are choosing to run their JD Edwards on OCI as it's far **easier to migrate** critical enterprise applications, it includes all the necessary services for developers to build cloud-native applications, and there is support for hybrid cloud strategies. With OCI you will:

- Reduce costs with ability to scale usage up and down as required
- Reduce Internal CNC support costs
- Improve security
- Improve performance
- Improve user experience
- In-place tech refresh and patching
- Proactive costs and usage monitoring
- Easier to manage
- Straightforward to migrate
- Flexible to scale
- High availability
- Autonomous services

WHAT ABOUT MY CUSTOMIZATIONS?

"We will lose our customizations when we deploy JDE on OCI."

The statement above is a common misconception. Customizations from your current E9.X release **will all come across** with JD Edwards when you deploy on OCI.

NEXT STEPS

Our experts are qualified to perform a **Cloud Readiness Assessment** in order to help you determine whether your business values align with Cloud and what could be the best strategy for your company moving forward.

To take advantage of this free cloud assessment, please email wliu@isp3.ca.

*"By 2022, over **90% of enterprises worldwide** will be relying on a mix of **on-premises/dedicated private clouds, multiple public clouds, and legacy platforms** to meet their infrastructure needs."*

INTERNATIONAL DATA CORPORATION (IDC)

OUR OWN EXPERIENCE

iSP³ was the **first Oracle customer in North America** to migrate our on premise EnterpriseOne applications onto Oracle's Public Cloud. We adopted the First Generation Oracle Cloud in 2016 which **decreased our monthly cost by 50%** and **improved our up time to 99.5%**. In 2018, we upgraded JDE to E9.2 and migrated to Oracle's Second Generation OCI in 3 months.

ORACLE SUPPORT REWARDS

In June 2021 Oracle introduced **Oracle Support Rewards** where you earn rewards by using OCI to reduce your support bill.

You can **reduce your Oracle technology support bill** by 25 cents for every dollar that you spend on OCI.
