

CAM Performance Plus

CAM Performance Plus is an enhancement toolset by Asset Management Solutions. Take advantage of the full CAM Performance Plus Suite or select just the products you need.

PrintCue Attachment Printing

You Can Finally Print JDE Media Objects

Print a complete work order, purchase order, or sales invoice – with all the related attachments, and essential elements – as a single document, the way you need for your business. This extension automates a frustrating limitation of JDE by automatically merging your attachments, pictures, PDF's, etc. into your final document, supporting both RDA and BI Publisher formats.

Preventive Maintenance (PM) Plus

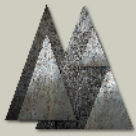

Manage PMs Better

The PM software for JD Edwards EnterpriseOne is complex; it can take up to 14 different screens and over 150 clicks to setup and schedule a simple oil change!

PM Plus addresses these pain points! PM Kit Wizard simplifies the Model WO process significantly. In 4 simple screens and 1/3 of the number of clicks, you can intuitively manage PM's for all of your equipment.

CAM Performance Plus

The most comprehensive enhancement tools for JD Edwards EnterpriseOne!

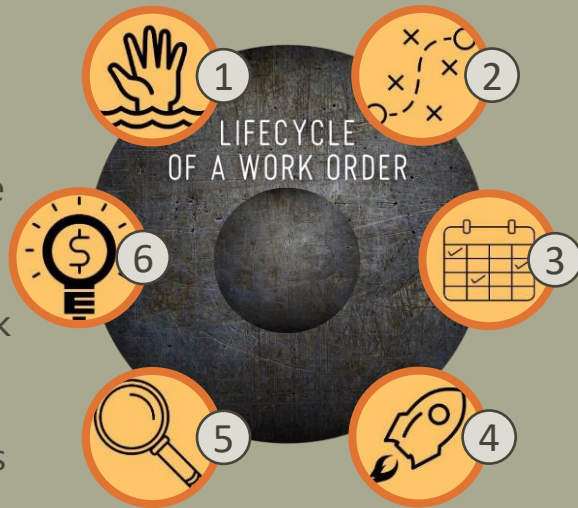

CAM Performance Plus

Work Order Lifecycle Suite

Manage WOs & POs Better

AMS understands a work order has an entire life cycle and various users along the way. We provide your team with an easier and more secure way to request, plan, schedule, perform, review, and close a work order.

Every step of the work order process needs to be easy, clear and secure!

- | | |
|----------------------------|-----------------------|
| 1. Request & Approval Work | 4. Perform Work |
| 2. Plan Work | 5. Review Work |
| 3. Schedule Work | 6. Accounting & Close |

CAM Performance Plus

“

Everything We Needed & More!

AMS created a custom suite of exceptional tools to perfect our Oracle JD Edwards EnterpriseOne work orders, inventory and maintenance needs. It generally fixed every pain point we had!

Once we implemented CAM Performance Plus, every aspect of our maintenance operations changed; tradespersons could efficiently print and perform work, planners no longer struggled to find parts and manage the WO backlog, and accounting now gets real-time allocation of maintenance costs.

It was a game changer and we wish we had found AMS years ago!

PARTS Pro

A Better Way to Manage Inventory and Parts!

- ✓ Avoid production downtime
- ✓ Automagically assign parts to work orders according to work priority and part availability
- ✓ Automated daily review of work orders to confirm parts availability and inventory issues
- ✓ Notifies you if parts were “stolen” (aka, pulled for an emergency) in the middle of the night

This saves you significant man hours and limits production downtime!

You will love our complete suite of enterprise asset management (EAM) solutions for Oracle JD Edwards EnterpriseOne software. Carefully designed to address your industry-specific pain points, our enhancements save substantial time, money and headaches for your entire team!
